

## Points to re-check:

- your device should be connected to a charger;
- your device should be placed on a dashboard the way the DOT officer has a full view without entering a truck;
- you should be logged in to our system using your credentials.

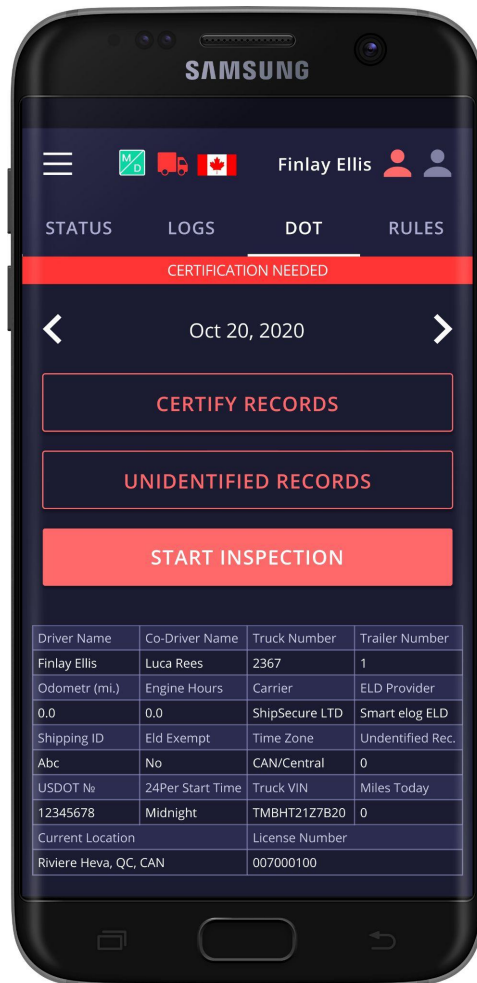

1.  Sidebar menu
2.  Malfunctions indicator
3.  Truck connection
4.  Country rule set
5. **Finlay Ellis** Current driver name
6.  Co-drivers' switch
7.  Current Status / Status Switch
8.  HOS counter

<sup>1</sup> Smart eLog is compliant with the Federal Motor Carrier Safety Regulations CFR §395.15 and 49 CFR 395.20 et seq.  
Smart eLog is compliant with Section 83 of The Commercial Vehicle Drivers Hours of Service Regulations regarding the use of the electronic logging devices.

# Inspection instructions

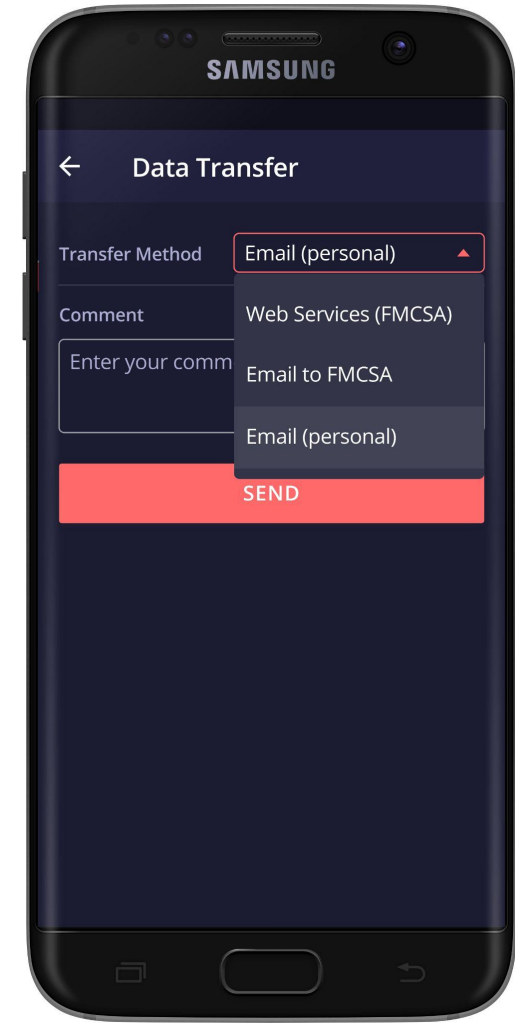

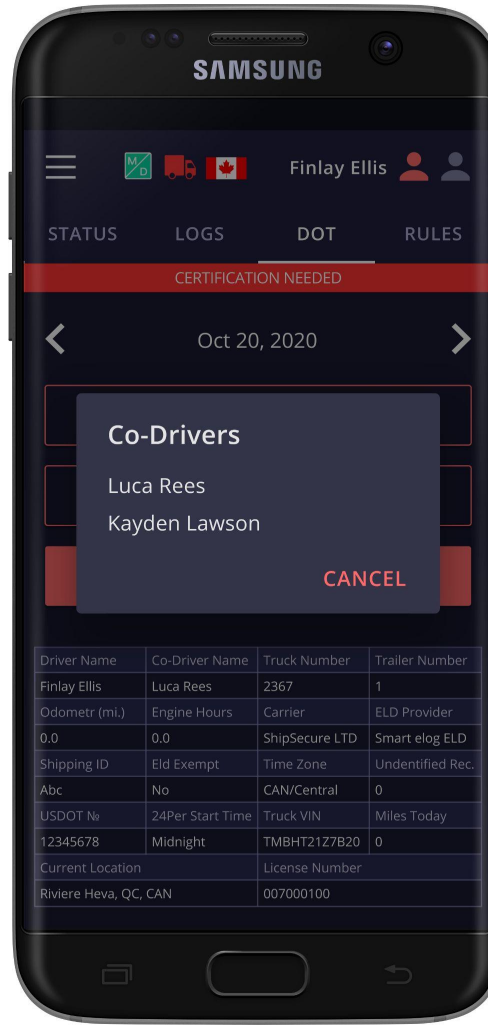

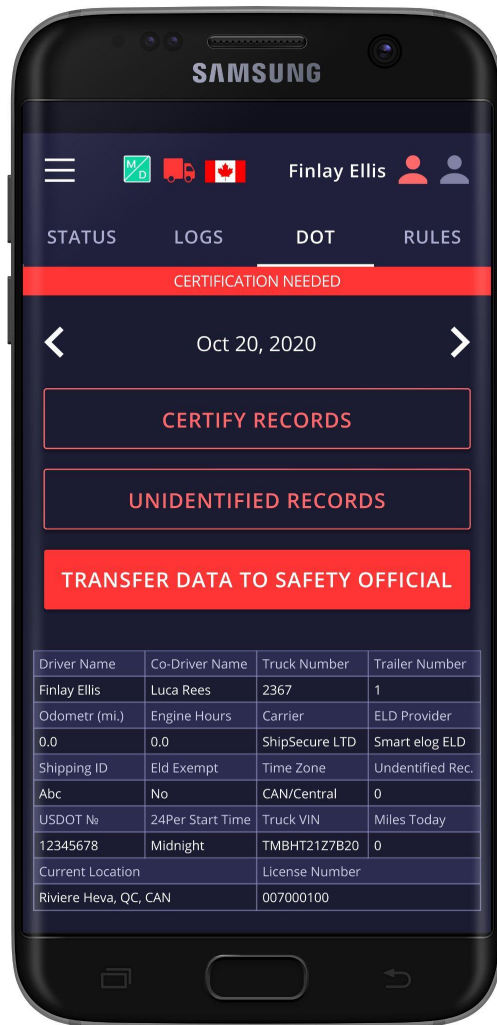

## For a driver:

**Step 1:** Open DOT INSPECT page

**Step 2:** Pass the device to the inspector

## For an inspector:

-  icon shows whether there are any malfunctions or data inconsistencies;
-  icon shows whether the truck is connected and the system is in the ELD mode;
- <> icons allow you to select a date to inspect;
- the form contains all data regarding vehicles, driver, and carrier;
- the graph shows the status change data;
- the table shows detailed data regarding each event.

If you need to send Data to FMCSA directly via email or web or you need to send data to the personal email - you should click the 'Start Inspection' and later 'Transfer Data to Safety Official'.

Please, pay attention that here you will see a list of all the co-drivers operating the same truck during the last 15 days period.

You may select one of the three options for sending: via web services to the FMCSA directly, via email to the FMCSA or any other account. You may also add comment if needed.

The image shows a Samsung smartphone displaying the 'Data Transfer' screen in the SmartElog app. The screen has a dark blue background. At the top, there is a back arrow and the title 'Data Transfer'. Below this, the 'Transfer Method' is set to 'Email (personal)' in a dropdown menu. Underneath, there is an information icon and the label 'Rules'. A dropdown menu is open, showing 'CAN' with a red border and an upward arrow, and 'USA' below it. Below the dropdown, there is a text input field labeled 'Enter an Email'. Further down is a 'Comment' section with a text input field and a character count '0/60'. At the bottom, there are two red buttons: 'GENERATE A REPORT FOR TODAY' and 'GENERATE A REPORT FOR THE LAST 15 DAYS'.

If you select Email (Personal), you need to select your country (for Canada, it is CAN). Then you need to enter the recipient's mailbox.

The image shows the same Samsung smartphone displaying the 'Data Transfer' screen. In this view, the country dropdown menu is closed, and 'CAN' is displayed in a small box next to the 'Rules' label. The rest of the interface, including the 'Email (personal)' transfer method, the email input field, the comment field, and the two red buttons at the bottom, remains the same as in the previous image.

Here you have two options to send the logs: choosing "Generate Report for Today" or "Generate Report for the last 15 days".
